

# PRODUCT NEWS

**Hurricane electric pump from Graco is ideal where compressed air is not available.** We have had a number of enquiries recently for these electric Hurricane pumps. Available in 240 or 110 volt versions they have a handy tubular frame, which not only protects, but also provides a handle for the pump itself. A digital meter is standard on all units and it measures in litres (or pints, quarts, gallons(US)) with an accuracy of +/- 1.5%. It will fit containers up to 44" (1.1m) tall with a 2" opening and can be supplied with the 25 gallon dispense cart shown. The units can have a 8ft (2.4m) or a 25 ft (7.6m) hose with a hose end meter or alternatively a "tapper" spout unit for dispensing at the pump, in which case the meter is incorporated into the housing.

## The New Generation ZVA Slimline 2

fuelling nozzle, featuring a lighter trigger action and quicker draining after shut-off, will be displayed on the Elaflex stand (E12) at the **IFFE Show** at the NEC Birmingham from the 6th to 9th April 2008.

Also on the stand will be the new generation dispensing hoses for standard, hi-flow and Stage II Vapour Recovery together with VR nozzles and safety breaks. All these are fully approved for use on petrol station forecourts.
